GLOBAL HAIRCARE SOLUTIONS FOR ALL CULTURES & ALL PEOPLE

Paul Brown Hawaii professional hairstyling appliances have been designed to help creatively style all hair types and textures. Applying heat to make the hair receptive to create a new look, texture and style needs to be done carefully. While heat softens the protein and restructures the hair, our hairstyling appliances protect the integrity of the hair. Both the new Pro Iron and our Pro Dryer have several temperature control features that will customize the strength and the speed of the required heat. This extra control allows for consistently beautiful hairstyling results!

PRO DRYER is engineered for healthier heat styling in a compact, lightweight design for easy use and effortless movement! Powerful, yet gentle airflow allows for faster drying and styling.

FEATURES

- Lightweight, yet powerful 2000 Watt dryer
- Flexible & long cord for less tangles and easy use
- Long lasting AC Motor
- Ergonomically shaped handle
- 2 dry time speeds
- 3 temperatures
- True cold shot button
- Directional nozzle and diffuser accessories
- 1 year warranty

PRO IRON is extremely user friendly and versatile. It will straighten, curl, bend, flip and spiral your hair! Plates are made of solid titanium with tourmaline, a precious stone which generates up to 6 times more negative ions upon heating than traditional ceramic irons. These extra negative ions along with gentle far-infrared heat will guarantee soft, smooth, frizz-free, silky straight hair without damage.

FEATURES

- Heats up in 8 seconds
- MCH Heater Thermostat Control: 248°F to 450°F
- Solid Titanium Tourmaline Far infrared IONIC
- Multi-directional floating plates
- Automatic shut off: 45 minutes
- 360° rotary power cord
- Flexible and long cord for less tangles and easy use
- Ergonomic diamond pattern
- 2 year warranty
