

SO.CAP. USA Hair Extension Preparation Products

To ensure a long lasting bond, you will need to use our provided Preparation Products. Use of this Step System will guarantee client satisfaction.

SO.CAP. USA Hair Extensions' specially formulated Preparation Products are to be used with the step system and cannot be guaranteed to function as promised if substitutes are introduced.

Whether your clients long for length, volume, flair or highlights, professional hair extensions will enable you to customize their look with precision and quality care. With over 85 haircolor shades in three different textures and four lengths, SO.CAP. USA Hair Extensions are ideal for any look your clients desire.

SO.CAP. USA Hair Extension products are among the finest in the world. Our private factory in Italy produces original hair extensions and bonding equipment, which are second to none. They use only the best, hand selected, real human hair that is pre-bonded with 100% Keratin Protein Tips to ensure a healthy, strong and long-lasting bond. Keratin is the same protein that makes up your own natural hair.

SO.CAP. USA Hair Extensions' innovative technology and product versatility allow for quality application without the use of extreme heat or harmful glues and adhesives.

Preparation Products

Step 1

PreCleansing Spray

Formulated for use on all hair types, the PreCleanser Spray cleanses and loosens dirt, oils, previous conditioners, serum and hairspray polymers which normal shampoo may not be able to remove. This product should be used prior to shampooing.

For Best Results:

Apply 10 to 12 sprays of PreCleanser to dry or damp hair from about 12 inches away. Allow to remain for 2 minutes then shampoo with Step 2 Clarifying Shampoo.

Step 2

Clarifying Shampoo

Clarifying Shampoo is a strong cleansing shampoo that is recommended for use prior to any chemical work such as perms and haircolor. It is also excellent for use on an oily scalp.

For Best Results:

Wet hair and apply the Clarifying Shampoo. Work up a rich lather. Rinse thoroughly. After shampooing, follow with Step 3 in order to place their hair in proper balance.

Step 3

Contracting Spray

The Step 3 Contracting Spray stops breakage & eliminates color change caused by curl and relaxer chemicals. It makes hair bright and shiny. Do not use immediately prior to a chemical service.

For Best Results:

After shampooing with Step 2 Clarifying Shampoo, towel blot hair and apply 6 to 10 sprays from 12 inches away. Allow to remain on hair.

This product must be used only as directed.
