## **Thunder Ridge Creates New Acne Solutions! Today, You Can Fight Acne With Emu Oil**

**Manassas, VA** Cleanser, toner, lotion, acne cream ... Cleanser, toner, lotion, acne cream ... Many people who suffer from acneic skin don't realize that the vigorous routine, the expense and the time you devote to this challenge is not the complete answer. We often pile on more drug store products, medical prescriptions and the new best products that are readily promoted on TV on your face. Many of us even tend to use more than is needed and the end result is still the same – breakouts with irritated and inflamed skin. With the rising green and natural products industry, many new products, protocols and natural acne treatments have arrived. A very special product that is getting much attention is Thunder Ridge Emu Oil, one of many products created by Thunder Ridge Emu Products; a 100% natural skincare line using AEA certified emu oil.

Acne is most often an internal problem caused by many factors. It may be caused by the overproduction of oil, dead cells that have not been sloughed away, environmental grit, sweat and makeup. These elements may seep into our pores, causing irritation. Anne Geller, owner of Thunder Ridge Emu Products notes, "Our Emu Oil is non-comedogenic. It actually aids in opening the pores to release the excess oil your body is naturally producing. Many people are using facial cleansers that only cleanse topically. Instead, we recommend that after washing a good quality cleansing bar they use a natural anti-septic such as Witch Hazel followed by Emu Oil. The Emu Oil combined with witch hazel will reduce the amount of bacteria within pores."

Emu Oil is almost 100% triglyceride lipid, a type of fatty compound that is also abundant in human skin lipids. Since emu and human lipids are almost identical, the absorption rate of Emu Oil into human skin is incredible! Studies have shown that the Emu Oil effectively penetrates through the epidermal layers of the skin down to the basal layer. This is where it starts repairing and nourishing the skin, which is why professional estheticians apply after intense acne treatments.

**Thunder Ridge Emu Oil** is made up of Essential Fatty Acids including Omega 3 (Linolenic), Omega 6 (Linoleic) and Omega 9 (Oleic). These Essential Fatty Acids have proven to be the nutrition your skin requires to remain healthy. Every day our bodies produce 300 billion new cells and each one of these cells needs Essential Fatty Acids to build strong cell walls. Omega 3 is a natural anti-inflammatory that aids in reducing inflammation that is caused by acne. Applying Emu Oil to puffy acneic areas will reduce the redness and inflammation. Also, if you have received intense, deep cleansing acne treatments, your face may be swollen, red or irritated. Applying Thunder Ridge Emu Oil will aid in cell restoration and calm areas of inflammation.

Nadine Toriello, esthetician at All About You Day Spa in Key West, FL professionally recommends Emu Oil to her clients. She notes, "I use Thunder Ridge Emu Oil in my treatment rooms. I've personally suffered from acne. When I used Thunder Ridge Emu Oil, I found that my inflammation went away and I also experienced less irritation. Some of my clients are a bit apprehensive about using Emu Oil because they believe they already have oily skin. However, I find that Emu Oil balances their skin and shows immediate results. For a great acne treatment I cleanse three times using a marine enzyme, which exfoliates the skin without scrubbing and this acts as a chemical exfoliant. Afterwards, I massage their face with Thunder Ridge Emu Oil to repair and moisturize. By using emu oil with their facial treatments, I assure them success."

**Emu Oil Has Many Extra Special Benefits:** With much research as evidence, Emu Oil has found its way into more and more dermatology offices, skincare clinics, day spas, natural product stores and your homes. No matter the age or degree of acne, Emu Oil is respected today as a safe and important ingredient option for many beauty care, health and wellness treatments. Thunder Ridge Emu Oil is hypo-allergenic, non-comedogenic, anti-inflammatory, absorbent and an extreme moisturizer, it is also hyper-oxygenated. Geller, adds, "You can actually see it work. Put a drop on your cheek and massage it into your skin. Your skin will immediately flush. That is the oxygen and blood being drawn to the applied area. If you can get the oxygen to the surface of the skin you can accelerate healing. It works beautifully after intense acne facials and on scars up to two years old."

**Skincare Challenges & New Solutions:** Most people who suffer from acne rely on their dermatologists and estheticians to provide the perfect solution. Prescribing creams and medications that are loaded with steroids may not be the best answer for you. Studies have shown that some of these solutions may cause severe liver damage among other side effects. As more people are taking responsibility for their own health, they are becoming increasingly aware of more health conscious options.

Today, Thunder Ridge Emu Oil is one of nature's best kept secrets. Emu oil is being used more and more in beauty care, spa and wellness products.
